DevOps Engineer with more than **8 years of experience** in **Electronic and Computer Engineering**. Skilled in **AWS, Kubernetes**, and **CI/CD** management. Dedicated to **automation** via **Terraform** and **Ansible**. **Distinct graduate** from **iNT-college at the open university**, emphasizing continuous learning, collaboration, and **efficiency**.

Work History

2022 - 2023 **DevOps Intern and IT Helpdesk Technician**

Tactivision Service Ltd, Tel-Aviv

- Interned while completing SRE DevOps Engineering course.
- Managed IT support, networking, and systems.
- Automated routine documentation processes.

2020 - 2021 **Network Technician**

Inbar Solar Energy Ltd, Airport City

- Tested network communication for PV Plant electrical cabinets.
- Led communication teams onsite.
- Collaborated with international engineering teams on communication cabinets.

Accomplishments

Network Technician, Inbar Solar Company (2021)

- Diagnosed recurring network issues and introduced a customer-accessible router restart button. This initiative notably reduced field calls, improving operational efficiency and customer satisfaction.

Military Service Accomplishment (2018)

- Revived old robotic systems without having their original guides. Created simple user manuals which are still used for robot maintenance.

Education

2022 - 2023 **S.R.E DevOps Engineer: Information Technology**

INT College-institute of Innovation & Technology - Tel-Aviv

2013 - 2015 **Practical Engineer in Computers & Electronics: Electrical Engineering**

ORT College - Rehovot
